Core products are typically available to ship from stock. Availability should be checked when placing an order. Lead time to ship will depend upon the dimension and volume of the product required.

This information is provided only as a guide and should not be used for specification purposes. Every application is unique and many factors influencing the performance of our product in situ, should be taken into consideration. The responsibility for testing and determining the products suitability for use in every application, is solely that of the customer or client. BIOLINK will not be liable for any loss or damage arising, whether direct, indirect, special.

For technical assistance and help on specific questions relating to the use of BIOLINK adhesive tape solutions, please contact our sales or application engineering department.

Our Application Guidance should always be used to determine the correct use and application of our products in the commercial environment.
